

## Diabetes Health Care Plan for insulin Administration via Insulin Pump School:

Start Date:	End Date	•	
Name	Grade/ Homeroom	Teacher	
Name 1 2	: Call in order of preference  Telephone Number	Relationship	Student Photo
	Phone		
Blood Glucose Monitoring	: Meter Location	Student permitted to carry meter	Yes No
Before rid	eakfast/Lunch 1-2 hours after lunch Being bus/walking home Always check when	fore/after snack Before/after exercise I I student is feeling high, low and during illnes	
	m snack at before/a	fter exercise	
	A 10		
☐ Treat with 10-15 g ☐ 4oz juice or ☐ Retest blood sugar eve ☐ If no meal or snack with ☐ If student unconscious	Treatment for Hypoglycer  ns of low blood sugar or if blood sugar  rams of quick-acting glucose:  glucose tablets or Glucose  ry 15 minutes, repeat treatment until blood thin the hour give a 15 gram snack or having a seizure: Give Glucagon Yellucagon Glucagon Glucagon Glucagon to be administered:	is belowmg/dl  Gel orOther d sugar level is above targetmg/dl  YesNo	Signs of Low Blood Sugar personality change, feels funny, irritability, inattentiveness, tingling sensations headache, hunger, clammy skin, dizziness, drowsiness, slurred speech, seeing double, pale face, shallow fast breathing, fainting
☐ Notify parent/guardi	an for blood sugar belowmg/	/dl	
	Treatment for Hyperglycer	nia /High Blood Sugar	
If student showing signs	of high blood sugar or if blood sugar is	s abovemg/dl	
☐ Allow free access to	water and bathroom		
Check ketones for b	olood sugar over mg/dl	lotify parent/guardian if ketones are	moderate to large
Notify parent/guardi	an for blood sugar overmg/c	11	
☐ See insulin correcti	on scale (next page)		
	guardian for <i>hyperglycemia emergency</i> dominal pain, chest pain, increased sle		
	Document all blood si	ugars and treatment	4

	Orders for Insulin	Administered via Pump	
Brand/Model of p	ump	Type of insulin in pun	ıp
Can student mana	ge Insulin Pump Independently: Yes	No Needs superv	ision (describe)
Insulin to Carb	Ratio: units pergrams C	Correction Scale:u	nits perovermg/dl
Give lunch dose:	☐ before meals ☐ immediately after meals	if blood sugar is less the	nan 100mg/dl give after meals
Parents are author	orized to adjust insulin dosage +/- by unit	s for the following reasons	
Increase/Decreas	e Carbohydrate	ty Parties Other	·
Student may:	Use temporary rate Use extended bolus	Suspend pump for ac	tivity/lows
If student is not a	ble to perform above features on own, staff v	vill only be able to suspen	d pump for severe lows.
□For blood sugar site failure and co	greater thanmg/dl that has not decreased ntact parents.	l inhours after correc	ction, consider pump failure or infusion
	failure, contact parent/guardian: Student/parent insert new infusion set	Can student ch	ange own infusion set  Yes  N
	Administer insulin by pen or syringe using pur	mp recommendation	
	ump failure suspend pump and contact parent		
5545	Administer insulin by syringe or pen using pur		
Continuous Gluc	ose Monitor (CGM)	□ S	tudent not using CGM
Name of CGM			
	blood glucosemg/dl Ale		
Alert for Low		ert for High blood glu
